## Halloween at the Institute

# Student's Work

There is no doubt that the invention of the car has changed the world. Although there are a lot of advantages, there are also disadvantages. People should be conscious about the way they use the car.

On the one hand, the invention of the car has allowed people to travel long distances in a faster way. However, the invention of the car was only possible because of the invention of the engine, which led to the invention of the plane and the spaceship.

On the other hand, cars pollute a lot and there are people that go alone in their cars instead of using public transport. Cars should only be used if they took several passengers at a time. Another point to be made is that there are a lot of unconscious drivers on the roads, which are a danger to the society.

In conclusion, I think that the invention of the car is one of the greatest inventions by Man. However, there are negative points and we need to be aware of them and try to find solutions for these problems.

*(Diogo Mato s -D teens - St Tirso)*

## My dream house

My dream house would be in Malibu and it would be a traditional beach house.

The house would have at least six bathrooms and four bedrooms. It would have a kitchen that's connected to the living room and the dining room, so it would give the illusion of an open space. I'd like to have a big staircase in the hall so you see it when you enter the house.

The garden would have an "infinity pool" and a lounge area where you could relax and look at the view. It would also have lots of fountains and statues because I love them, and lots of trees and hibiscus. Of course, I would have a garage, but I don't want to have many cars... I just need one or two.

My house would overlook the sea and all the hills in Malibu.

Basically, my house would be simple, beautiful and luxurious, but not too outrageous.

*(Sofia Furtado – B teens – St Tirso)*

## The storm

"Last night I had a really weird dream," said 14-year-old James King.

"Really! Tell me more about your dream." asked James's friend Liam Fisherman.

"Well, in my dream I saw a big and violent storm in the sea. The sky was black, the waves were 50 metres tall, it was raining hard and the wind was really strong. But then I saw a little boat trying to survive that nightmare.

Suddenly, a huge wave, bigger than the others, arrived and the boat broke into thousands of pieces and no one survived. I woke up all sweaty and I kept thinking about your father. Isn't Mr Fisherman going to sea tomorrow?" wondered James.

"Actually, yes, he is" answered a now worried Liam. "I have to stop him!"

Later on the same day Liam was able to convince his father not to go.

Next morning the breaking news was about a boat that was destroyed by a terrible storm. There were no survivors.

From that day on, James always believed in his dreams.

*(Francisca Santos – C teens – St Tirso)*

## Dancing- A great way to have fun and practice sport!

I first started dancing when I was 4 or 5 years old. I asked my mother to join a dance club with my girl friends from kindergarten.

I found out I really enjoyed dancing when I first performed on the stage in front of everyone. One of my friend started crying and she didn't want to dance anymore. Although I had some insecurities, I danced and after that my parents were proud of me, but more importantly than what the others were thinking, I was even more proud of myself. The years passed and I was happy with doing hip-hop, however, I wanted to try another kind of dance, so I started having ballet classes. I like them but with the pressure of having good marks at school, I couldn't keep up with both the classes and tests, so I had to stop. Although I stopped, I still think I can dance very well. Nowadays, I dance when I have time, I really like the Kizomba and Zumba classes.

I'd recommend it as a hobby because it helps people to practice sport in a fun way but keeping them healthy at the same time!

*(Inês Reis – F.C.E – St Tirso)*
